

MEDICAL DEANS ORGANISATIONAL CHART – JANUARY 2024

MEDICAL DEANS STANDING COMMITTEES

Notes:

- Members of MDANZ Standing Committees and Working Groups must be employed by an MDANZ Australian or New Zealand medical school, unless otherwise stated in their TORs.
- Working Groups are established by and report to a Standing Committee of MDANZ with the approval of the Executive Committee. They are time-bound groups with Terms of Reference (TORs) outlining a specific activity or set of tasks. The Chair of each Working Group is a member of the Committee which auspices the group.
- Special interest groups (green circles) are self-organising groups of those working in the medical education sector with interests and expertise in a specific field:
 - Membership is primarily for people employed by a member medical school of MDANZ.
 - Anyone wishing to join who is not employed by a member medical school must be nominated by someone from a member medical school, and their nomination shared with the group for consideration. Any one current member (who is employed by a member medical school) can veto the approval of a non-MDANZ member wishing to join.
 - **Members are expected to respect the privacy of contributors to the SIG.** Information shared in confidence by members of the SIG should only be shared externally with prior consent from the medical school responsible for the information.
 - Any concerns with the behaviours of individuals within the group must be raised directly with the MDANZ CEO, who will then determine an appropriate course of action.
 - The views and activities of special interest group members are not necessarily those of or endorsed by Medical Deans Australia and New Zealand.
- Unless their comments reflect a previously approved and released statement or position, members of any group do not have authority to speak on behalf of Medical Deans without prior approval by the Executive Committee.
- Members of any group do not have authority to authorise Medical Deans' endorsement of any materials (whether developed within Medical Deans, a member school or university, or by an external stakeholder) without prior approval by the Executive Committee.
